Brush Tool Photoshop Download Download [32|64bit]

1. **Choose Image**. The Image menu lists the files available for use in Photoshop. Clicking the folder icon or pressing Ctrl+A (Windows) or ⌘+A (Mac) adds the files from that folder to the list. You can also navigate to files using the tools on the Files panel or with the file system window. 2. **Open the file you want to use**. The top part of the Photoshop window shows the image file in its native format, much like what you'd find on a scanner. If you have an image open in another program—or if you create one in this book—you can bring that image into Photoshop and work on it here. 3. **Open the file in the Layers panel**. See Chapter 3 for the lay of the land in the Layers panel. 4. **Create a new layer if you don't have one yet**. Click the New Layer icon on the Layers panel, or press Shift+Ctrl+N (Shift-⌘-N on a Mac). Now the Layers panel includes an additional field for you to enter a new layer name. 5. **Adjust the Layer's Opacity**. The Opacity slider allows you to set the visibility of the new layer. Layers are generally invisible by default; the Opacity slider sets how transparent they become (higher numbers mean less visibility). If you want to use the layer as a background, right-click the layer to create a selection, or press Ctrl+J (⌘-J on a Mac), and then drag it around the image.

BMW M6 GT2 wins Liqui-Moly Bathurst 12 Hour The BMW M6 GT2 has taken the 2012 Liqui-Moly Bathurst 12 Hour title and its creators to level four in the Bathurst Best Team Performance series. Ganassi Racing is celebrating another success as the team has claimed the Liqui-Moly Bathurst 12 Hour. The BMW M6 GT2, driven by the trio of Patrick Lindsey, James Rossiter and Philipp Eng, claimed outright and overall victory over the field in its first race at Mount Panorama, having triumphed in the first two races of the Liqui-Moly Bathurst 12 Hour. The Ganassi team dominated the race from start to finish with its new-generation BMW M6 GT2, which spent much of the weekend at the top of the timesheets. Crew chief Ricardo and engineer Danny Davis, who made their debut at the V8 Supercars and Bathurst 1000 races at the end of 2010, engineered the car to an excellent victory. The team reported for the race with a 37-point advantage and was immediately set to work with a simple objective – to pull away from its field. Led by Patrick, the team drove at the front from the front of the field all the way to the chequered flag, leaving the opposition in its wake. James and Philipp’s three-way battle was an important element of the victory and they had just six hours to drive. The BMW M6 GT2 team is delighted with its emphatic victory. As Patrick Lindsey said afterwards: “It was our first run at Mount Panorama and I’ve never driven anything so fast, so it felt special.” James added: “I’ve never driven at Mount Panorama in these cars before. It was so good to drive, everyone was so fast and it felt really great.” Philipp stated: “I’m happy for us, for the team, for Ganassi and for BMW Motorsport. It was the first race in Australia for us and it was a good race. I think the BMW M6 GT2 was just too good today.” The team will now prepare for its next race, the Liqui-Moly Bathurst 12 Hour at February 11-12.
